Upgrade point from the previous generation :

1. Higher waterproof grade, IPX5
2. Add front and rear turn lights and driving lights.
3. Adding an electronic control box, battery, and electronic control system separation, the cables will be simpler, more convenient for after-sale, the capacity of waterproof will be better.
4. Controller current increases to 50A, motor maximum power increases to 8400W.
5. Sine wave configuration, add TFT large screen display, new UI design (more beautiful. Intelligent), all kinds of working state can be displayed. Internal parameters: front and rear power, front and rear start torque can be adjusted by itself. Front and rear motor power, temperature monitoring, can DIY your driving mode.
6. Double model and ECO mechanical switch to add light to indicate working state.
- 7.WOLF KING GT handle and shock absorber rod lengthened, more suitable for European and American people riding.
